| ITE011124 | PROJECT MANAGER | AGRIC | Lagos, Nigeria | 15 December 2024 |

COMPANY PROFILE: An Agri business investment platform, primarily focused on investing along the Africa Agriculture Value Chain (Trading and Farm production)

Job responsibilities include:

- Lead and oversee the execution of multiple projects simultaneously, ensuring the highest standards of safety, quality, budget adherence, and project timelines.
- Provide critical support and follow-up with the permitting and engineering teams to secure local approvals and meet regulatory obligations.
- Cultivate and manage relationships with suppliers, including EPCs and engineering consultants, ensuring optimal and sustainable procurement aligned with HSE, quality, and compliance guidelines.
- Enforce strict adherence to project design and material selection, in accordance with contractual requirements and industry best practices.
- Conduct regular on-site visits and generate detailed reports to uphold construction quality and safety standards.
- Direct the commissioning and testing phases of projects, ensuring alignment with contractual requirements and industry benchmarks.
- Oversee the seamless handover of projects to both the Operations & Maintenance Team and the Client, meeting set contractual objectives.
- Manage comprehensive documentation, adhering to company requirements and industry standards.
- Operate in compliance with Group Health, Safety & Environment (HSE) requirements, emphasizing a strong safety culture.
- Collaborate closely with technical services for continuous improvement, utilizing technical specifications effectively and leveraging remote engineering support when applicable.
- Engage in strategic commercial negotiations and maintain robust relationships to ensure optimal and sustainable procurement of equipment and contractors.

JOB REQUIREMENTS:

- Degree in Civil Engineering, Construction Management, Architecture or a related field.
- Minimum of 10 years of progressive project management experience, particularly in the management of complex and large-scale projects.
- Proficient in project management tools and software (MS Project, Excel, etc.).
- Professional certifications in project management, such as Project Management Professional (PMP) or PRINCE2.
- Substantial experience in managing construction projects, preferably in the agro-processing sector, is crucial.
- Proven track record of consistently delivering high-quality project results within specified timeframes and budgets.
- Expertise in project monitoring and evaluation, with a track record of preparing and presenting comprehensive project reports.

COMPENSATION/PERKS:

Commensurate with experience.
